

TECHNICAL DATA SHEET

Preventive DF

Description

A solvent deposited rapidly evaporating dry to touch rust preventive for medium term indoor and covered corrosion prevention.

Benefits

- Excellent corrosion prevention
- Fast evaporating
- Cost effective
- Dry to touch
- Longer term storage
- Drier quicker for packing
- Very economical in-use
- Suitable for handling

Typical Physical Properties

Appearance	Pale fluid
Specific Gravity	~0.83 @ 20°C
Foaming Tendency	Low
Viscosity at 40°C	1.8 cSt
Humidity cabinet protection	60+
Usage Concentration	As supplied

Application Method

Preventive DF is suitable for ferrous and non-ferrous metals

Preventive DF can be applied by dip, swab, spray or brush.
