

Rust Preventive XL

TECHNICAL DATA SHEET

Rust Preventive XL

Description

This is high performance dewatering emulsion rust preventive. The product is designed as a preventive coating for engineering components, and coating components prior to long term indoor storage.

Rust Preventive XL has been designed not only to give excellent indoor storage protection, but also inhibits corrosion when items are in contact (stacked).

Benefits

- Good corrosion inhibition
- Dewatering effect
- Cost effective
- Inhibits contact corrosion
- Indoor storage
- Can be used inter operationally.
- Very economical in-use
- Components can be stacked, coiled.

Typical Physical Properties

Appearance	Brown Liquid
Specific Gravity	0.9 @ 20°C
Foaming Tendency	Low (100ppm water)
Viscosity at 40°C	~2cSt – dilute
Corrosion inhibition	Excellent.
Humidity Cabinet days pass	60+ (20%)
5% Salt spray hours pass	72+ (20%)
Usage concentration	10% - 30% depending on severity

Application Method

Rust Preventive XL is suitable for medium term indoor corrosion inhibition of ferrous metals. It can be used on stacked components, and on steel strip.

Rust Preventive XL should be used diluted as recommended.
