

Tantaroll STS/M

Product Description

An extreme pressure oil designed specifically for the drawing of steel bar on a variety of equipment ranging from draw benches to high speed automatics such as Schumags.

These lubricants are suitable for various steels ranging from free cutting alloys up to certain medium carbon and stainless grades. The oils are usually applied by circulation to the dies and may be used in conjunction with lime coating.

Product Characteristics

Kinematic Viscosity @ 40°C	138.0 cst
Kinematic Viscosity @ 100°C	13.50 cst
Specific Gravity @ 15°C	0.9330

Availability

Contact Sales Desk for product availability.

Health and Safety

Normally safe in use. Before using this product reference should be made to the relevant Material Safety Data Sheet.
